Fantastic location and lot! This three bedroom and two bath home reflects the quality of the building skill in the 1950's. Meticulously maintained with a two car garage, hardwood floors, gas furnace and hot water heater, private back yard on a tree shaded .35 acre level lot. Electrical upgrades would allow for electric car charging in the garage which also boasts a nice storage room. The basement laundry room and workshop is heated and cooled but not counted in the main square footage.
